Mr. Betters was presented a plaque in recognition of his 22 years of dedicated service to public health while serving on the Delta Menominee District Board of Health.

4.5—Medical Director's Report

- Influenza cases are low this year compared to last year. This year's vaccine is a good match to the current strains. One problem is that the most predominant strain is resistant to Tamiflu which is the usual treatment.
- Though the number of people receiving flu vaccination is increasing, many people are opting not to get vaccinations for other diseases such as measles. These decisions are sometimes influenced by inaccurate information about potential side effects of the vaccines. For example, a poorly conducted study initially associated MMR vaccine with autism; later well-designed studies showed no relationship but the negative effect of the initial report remains.
- Concerning the salmonella found in peanut products, peanut butter in jars is safe to consume but other peanut-containing products are questionable.
- Concerning the medical marijuana issue, County Health Departments are not involved. It will be managed at the State level.

5. Health Officer's Report

- Environmental Health has sent letters out to everyone denied permits since 2000, informing them of the Sanitary Code change and offering the opportunity to reapply.
- LMAS is amending their sanitary code using some language from our new code and technical manual.
- On March 6th Ms. Chenier, Irene Lenberg and Evi Lindquist will present our Quality Improvement Project at a State site visit by national partners.
- State budget changes do not appear to significantly affect Public Health programs at this time.

6. Public Comment – None

7. Adjournment

There being no further business, a motion was made by Mr. Betters with support by Mr. Elegeert to adjourn the meeting. Motion was carried and meeting adjourned at 5:40 p.m. CST.
